

Black Canyon Conspiracy (The Ranger Brigade #4) By Cindi Myers This novel is action packed with the tension ratcheting higher once Lauren and Marco try to take down the formidable Richard Prentice a man whose money has put him above the law. The growing partnership between her and Marco rises beyond mere heat (although I could have done without the obligatory kissing-while-in-the-middle-of-danger scenarios) and I was thrilled to see her taking her part in getting them out of some sticky situations. Black Canyon Conspiracy (The Ranger Brigade #4) Miniseries: The Ranger Brigade Black Canyon Conspiracy (The Ranger Brigade #4) Miniseries: The Ranger Brigade Black Canyon Conspiracy (The Ranger Brigade #4) I will miss this series. With Marco by her side she figures the best plan of attack is to meet Prentice head on especially since other frightening events have occurred to her that she believes he is responsible for. Of course this doesn't go to plan! While I enjoyed this romantic suspense tale I think Cindi Myers was making a lot of it up as she went along! By the end quite a few plot strands don't make sense in retrospect. Why would Richard send her a death threat tamper with her car brakes shoot her ex-husband dead and try to kill her in his house if his ultimate goal was to have her be the mentally unstable scapegoat for all his nefarious plans? It made no sense! While Lauren and Marco are on the run from Prentice is where this story hits its stride and delivers some decent action sequences and suspense. Brilliant Black Canyon Conspiracy (The Ranger Brigade #4) The story of a woman who is a journalist and got kidnapped by a person who she trust but he didn't let her go away from him because he want her to be his possession but she being wild soul didn't like and and when she got rescued she put a charge and the guy defies it saying she is mad and crazy and she came for help and he did it but now what goes wrong he doesn't know and turn the face of the case totally and rescuers have to face the wrath as the team got disbanded but a former special forces guy won't let it go so easily he stand by girl they attacked her to get even with her but she stand bravely and take a bolder step and was about to get trapped but she escaped with same special forces officer and crack the conspiracy of culprit that he want to destroy nation but there team stand against them and won the battle and get them eliminated finally she confessed her love and got married in Las vegas with her sister and her lover a double wedding Black Canyon Conspiracy (The Ranger Brigade #4) Excellent conclusion to the series. I loved the ending as they confessed their feelings for each other but also accepted the truth that their lives together would probably never be easy but if they were together it would all be worth it. I also enjoyed that the hero Marco did his research on the illness and did not try to push Lauren past her limits but recognized how he could support her when she experienced any bipolar episodes. I had not read any of the previous books in this series so I was a little confused by some of the secondary characters but overall I loved the team dynamics and how Marco and the heroes from the previous books recognized that the women in their lives were strong and able to protect themselves. This novel begins after a series of events that take a bit of explanation, The author doesn't give us all the details at once but allows the reader to piece together the needed information through following the story. The romance builds slowly but steadily as we're dealing with two people who have trouble getting a grip on their emotions: One is the typical stoic male a man who favors the John Wayne school of feeling, But his closed-off emotions aren't due to some foolish ideal of manhood but simply a necessary aspect of his life as an ex-Special Forces soldier, Marco Cruz has seen and done terrible things and he's had to compartmentalize his feelings if he wasn't going to go insane: She's been diagnosed as bipolar and needs medication meditation and a serene environment to keep her mental faculties from yawning out of control: Naturally in this situation in which Lauren is being beset by her former kidnapper serenity is going to be the last thing she gets. He's a forceful villain and the threat he poses is dire enough to be believable, She herself is resourceful strong and powerful learning an inner and outer strength she didn't know she had. This novel is definitely a notch above others I've read recently and deserves a look by people who like their romance with powerful strong female leads. Black Canyon Conspiracy (The Ranger Brigade #4) Lauren Starling is a TV reporter who (in a previous book I believe) was the prisoner of demented millionaire Richard Prentice, She was rescued by ex-Special Forces agent Marco Cruz and a connection has remained ever since: Due to his money and connections Prentice is able to get Lauren fired because of her bi-polar disorder claiming she is obsessed with him, He also convinces a grand jury that he is innocent and gets the joint operation that is after him disbanded. However getting there is a bit of an uneven ride as the events that take place up until that point are unclear as to their relevance after the final outcome is revealed: Marco is my kind of alpha male! He's scared to love of course but it's due to the vulnerability it could expose him to in his line of work: Also his very job description relies on this sort of stoicism: I didn't really like the way the book bandied about the term crazy so loosely! It's okay to be crazy. We obviously still have a long way to go in terms of this sort of casual ableism in fiction! I really liked the character of Lauren's sister Sophie: If the first half had more of a connection to the exciting second half this would have been 4 stars! What a pity: Black Canyon Conspiracy (The Ranger Brigade #4) full of suspense This book is so full of suspenseful moments that I thought for sure Marc and Lauren would be caught or killed, Lauren is the reporter who had gone missing in the first book and who was rescued at the end of Colorado Bodyguard, She is determined to see the man responsible brought to justice but he is rich and powerful and very good at evading consequences for his actions, Marco is one member of the Ranger Brigade and the one who helped rescue Lauren: He has spent years burying his emotions in order to do his job but something about Lauren has those feelings reappearing, When it becomes apparent that someone wants her dead Marco is the one determined to protect her. Throughout the previous books all clues led to Richard Prentice being the mastermind behind the crime wave in the area but hard evidence was impossible to find. Even after Lauren's rescue he was able to sway public opinion against her. His diatribes against the government in general and the Ranger Brigade in particular end up getting the task force disbanded: But being the good guys that they are the whole crew and their ladies refuse to go down without a fight, Taking the investigation private they come up with an unorthodox plan. Lauren and Marco will beard Richard in his own home and attempt to find the proof that they need. What

happens then sends Lauren and Marco out into the wilderness on their own trying to evade capture: They stumble upon something so unexpected and frightening that they realize they are the only ones who can prevent a huge disaster, I loved their creativity and resourcefulness as working together they are finally able to bring an end to Richard's delusions. The entire last third of the book had me on the edge of my seat as I wondered how they would get out of one crisis after another. The final confrontation was intense and scarily realistic in today's world, Lauren has had an especially rough time lately and recently diagnosed with bipolar disorder is finally getting her life back on track. She is dealing with the stigma of mental illness which makes her reluctant to believe that someone like Marco could ever be interested in her, I loved the way that Marco not only didn't look down on her he admired her strength and her courage and made sure she knew it: He had his own insecurities thanks to his youth in gang ridden LA and his later activities in the Special Forces, He was sure that Lauren could do much better than someone like him, Black Canyon Conspiracy (The Ranger Brigade #4) A really fun edge of your seat read. What I really enjoyed was the author portrayed a heroine Lauren with bipolar disorder something I can't recall seeing in any of my previous reads: I loved that she did not try to hide any of the symptoms that Lauren experienced but let the reader experience with Lauren her ups and downs. He knows what's going on between them is unprofessional. But also undeniable. Lauren Starling has the opposite problem. He's powerful ruthless cunning and devious. Lauren proves herself to be a capable partner to Marco. My kind of gal. I loved the characters. Lauren won't go down without a fight. Nonetheless they are exciting in their own right. Characterisation is good. It was realistic and believable. Lauren wasn't quite as successful as a character. She was smart and strong. I loved the relationship that grew between Marco and Lauren.
