Librarian Note: There is than one author in the Goodreads database with this name, A lifetime's fishing experiences written by one of the UK's leading fly fishermen, Brian Clarke is one of Britain's best-known fly-fishermen - and one of the world's most widely-read angling authors, His monthly column for 'The Times' has become an institution. His widely-ranging penetrating and often provocative articles for that newspaper and for 'The Sunday Times' have been required reading for serious fishermen for over 30 years, This collection of 71 articles and new essays distils the author's lifetime experience. The whole book carries the authority of Brian's pioneering work in the sport - and of his groundbreaking studies of trout behaviour especially. It is informative thought-provoking entertaining and beautifully written, 'On Fishing' will help anyone who fishes for anything to understand more to think more and to catch more, It will draw even non-anglers down into the world under water - and to the fascinations that fishermen find there: On Fishing Este libro fue un regalo-broma de mis hijos por el día del padre (no te gusta leer en inglés? Pues mira lo que hemos encontrado por 3 euros), Pero resulta que Clarke escribe sobre su obsesión con mucho humor cariño humildad, Me ha recordado al James Herriot capaz de subyugarte con la vida y anécdotas de un veterinario rural (¿?). Obviamente no soy pescador ni pienso serlo. Así que chicos. The joke's on you! 9780007281107
