Manly P. Hall (1901 1990) founded the Philosophical Research Society in 1934 a non profit organization dedicated to the dissemination of useful knowledge in the fields of philosophy comparative religion and psychology. It is not easy to answer the simple question: What did the Egyptians know about the human soul? Translators have not concerned themselves too much with the metaphysical speculations of the past and have been content to restore the obvious parts of mythology history and chronology. Can we say however that modern culture is in large agreement on the meaning of the word 'soul'? Certainly there are several schools of thought and even the advancement of scientific procedure has not led to a conclusive or inclusive definition:

Can't go wrong with Manly P Hall His books and content precise and to the point, Pamphlet Interesting reading of course! But there are less expensive sources to obtain this book like Manly P, Hall's Philosophical Research Society in Los Angeles CA! Pamphlet I'm a big fan of Manly P. In his long career spanning than 70 years of dynamic public activity Mr, Hall delivered over 8000 lectures in the United States and abroad authored over 150 books and essays and wrote countless magazine articles. Halls lectures have been transcribed and are available as pamphlets; others were taped live and the audio recordings are available on CDs as well. He is perhaps best known for his 1928 classic The Secret Teachings of All Ages an encyclopedia of the worlds wisdom traditions and symbolic disciplines: Today younger generations are re discovering the works and words of Manly Hall finding that the material he put forth so many years ago is still relevant and useful today, Halls hope for humanity was to learn from the greatest minds of all times so that we may solve current problems both in society and in the individual today: An illustrated study of 'The Egyptian Book of the Dead' and Egyptian metaphysics during the Osirian period, Although much of their wisdom remains locked in hieroglyph and symbol the Egyptians were an old and wise people: Dedicated as they were to the deepest religious and philosophical speculations the priests and scholars of ancient Egypt were not deficient in essential learning, By 'essential' we mean that which is concerned with essence and principle rather than with substance and appearance: There is also indication that in different periods of their development the Egyptians changed their opinions and a survey of their surviving literature reveals certain inconsistencies: The Soul in Egyptian Metaphysics and The Book of the Dead.
